Course Description:

The speaker is a dental materials expert from Ultradent Products. She brought a multitude of products that we were able to work with and manipulate throughout the day. The course included the use of composite materials, liners, sealers, primers, retraction cords, matrix bands, polishing disks, endodontic instruments, pit and fissure sealants, temporary cement and bleaching materials. I personally use and highly recommend Ultradent's alginate that has a color-changing feature. This was a very fun and informative course.

I certify that I have successfully completed the above course.
